

CIA TEAM

INFRASTRUCTURE

PRESERVATION

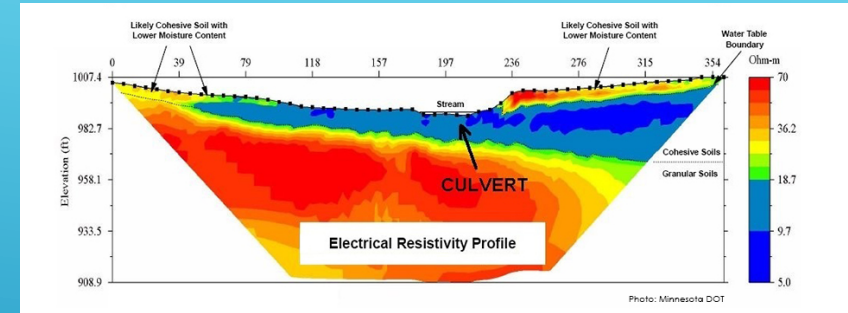

NJDOT – Bob Signora

FHWA – John Miller

EDC5 Initiatives Assigned:

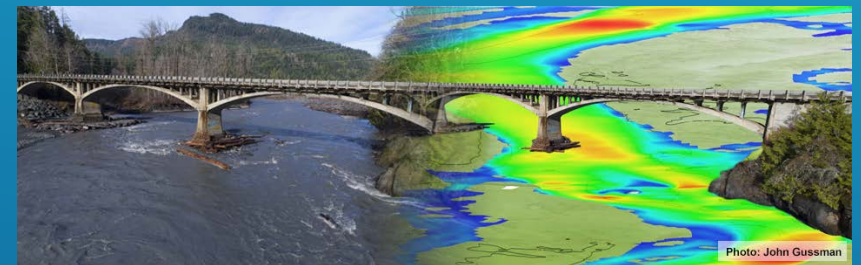

Advanced Geotechnical Exploration Methods

- Revising the Design Manual to include innovative technologies for enhancing the subsurface exploration program.
- Continuing to evaluate, on a project by project basis, the feasibility of implementing the new technologies.

Collaborative Hydraulics: Advancing to the Next Generation of Engineering

- We're putting together a document discussing pros and cons of using the program, as well as recommendations
- We will use one of the 2D models to show NJDEP. We will also continue to test the different abilities of the model.

EDC5 Initiatives Assigned:

Project Bundling

- NJDOT is exploring the use of project bundling solicitations for Intersection Improvement projects and Delaware & Raritan Canal bridge replacement projects.
